

PRESS RELEASE

Schwarzenburg, July 1st, 2013

The new powerful Gilgen swing door drive unit FD 20

Gilgen Door Systems, the Swiss manufacturer of automatic door, gate and wall systems, is in a position to offer their customers as of now the powerful and silent Gilgen swing door drive unit FD 20. This door operator, which is a completely new development, distinguishes itself by its compact construction type and extraordinary power that enables it to open and close exterior doors even with wind speeds of up to 80 km/h.

In every place where people work, are cared for or live, there are inevitably doors hampering or impeding a smooth pedestrian flow. An automation of these doors creates obstacle-free passages as well as hygienic and smooth work sequences.

The universally applicable Gilgen swing door drive unit FD 20 is equally appropriate for new installations as well as modernizations. Not only light-weight interior doors but also heavy exterior doors can be automated without problems. The electro-mechanic door operator guarantees noiseless and smooth door movements. Thanks to its no-frills design, the Gilgen FD 20 can be harmoniously integrated into any type of building architecture. And the wide range of functional possibilities makes sure that the customer gets an automatic door that is precisely customized to meet all his requirements.

For more information, please visit our website www.gilgendoorsystems.com or make an appointment with one of our sales specialists. We are looking forward to hearing from you!
